Radley

Practice activity:

Development buckets

You are a new product manager at an
elder care robotics startup

An affordable communication and companion service enabled by a robot we call a Radley

[Why a robot?](#) [How it works](#) [What it does](#) [FAQ](#) [Contact](#) [About](#) [Sign Up](#)

You are working with your engineering team and product designer...

...deciding what development efforts to **prioritize** over the next eight weeks

An affordable communication and companion service enabled by a robot we call a Radley

Stay connected

You have many **opportunities**:

1. **Generative AI-powered voice chatbot** for helpful and engaging conversations
2. **Custom links** for a major elderly care company to connect their billing systems
3. **Fix contact lists** not displaying correctly
4. **Fix inaccurate battery charge** levels
5. **Redesign the robot ID** (industrial design) to make it friendlier and more appealing
6. **Rearchitect our database**
7. Create a **prototype** for fall detection alerts
8. **Remote body temperature detection** trial
9. **Migrate cloud platform** to AWS

Re

An affordable communication and com

The prioritization debates have been **confusing**

Should we focus on...

- **Generative AI-powered voice chatbot**
 - Our strategy, roadmap, and OKRs have set this a high priority
- **Custom links** for a major elderly care company
 - Sales wants this badly
- Fix inaccurate **battery charge levels**
 - A top customer support issue
- **Rearchitect our database**
 - Engineering is worried about code-red crashes if we don't solve this

Your challenge

- How can you set the right priorities for the next eight weeks?

Guidance

- Use the development bucket template to help guide your thought process
- Put the 9 opportunities in the right categories

An affordable communication and companion service enabled by a robot we call a Radley

Development buckets

Development categories >>	Big impact items	Near-term client enhancement requests	Support & bug fixes	Platform, technical debt, and stability	
Percentage of development time	60%	15%	10%	15%	Generative AI-powered voice chatbot
Items	Item 1 Item 2 Item 3	Item 1 Item 2 Item 3	Item 1 Item 2 Item 3	Item 1 Item 2 Item 3	Custom links
					Fix contact list
					Fix inaccurate battery charge
					Redesign the robot ID
					Rearchitect our database
					Prototype for fall detection
					Remote body temperature detection
					Migrate cloud platform

Place each blue item into the right development category

Development buckets

Development categories >>	Big impact items	Near-term client enhancement requests	Support & bug fixes	Platform, technical debt, and stability
Percentage of development time	60%	15%	10%	15%
Items	item	item	item	item
	item		item	item
	item			
	item			

Your answer will look something like this
